Theme = HONESTY

Subjects at a Glance 

Science: Unit 6.2 - "Body Systems"
ADV100 Math: Unit 5 – Ratios and Proportions (*finishes*)

Teacher Notes

Teacher Professional Development

I thought I'd take a moment to share the coursework that we as teachers are studying most recently in our state required professional development work. Over the December break, we were enrolled in an interesting course on social and emotional development and its impact on learners. One example of our learning is the importance of helping students learn self-awareness and at the same time learn to appreciate cultural diversity. Over the February break, we were enrolled in a second course that went into more detail on this topic and how it can be intertwined into daily lessons. For example, how students can benefit from learning to productively work in student teams. This next Tuesday, we are enrolled in a course on Differentiated Learning. Each year, we as teachers get the chance – per state licensing requirements – to enhance and further develop our teaching skills – which of course benefits our students. So while the children enjoy the day off next week, their teachers will be hard at work learning 😊

Parent Portal / Website Reminder

Two great websites for strong family support and involvement:

1. Parent Portal: I upload new grades weekly – no need to wait for a progress report – it's a click away!
2. Room21mader.weebly.com –classroom website – quick links to DE Techbook and Spelling City...
